EDUCATION

University of Pittsburgh

Pittsburgh, PA

B.S in Computer Science, Minor in Economics — GPA: 3.8/4.0

Expected Graduation: December 2027

Courses: Data Structures & Algorithms, Database Management Systems, Software Systems, Software Engineering

Certifications: Amazon Web Services Certified Developer – Associate

EXPERIENCE

Wabtec Corporation

Pittsburgh, PA

Software Engineer Intern

May 2026 - Present

- Automated AWS cost anomaly alerts across 149 accounts, eliminating 4 hours/week of manual FinOps work with EventBridge and Lambda
- Saved \$12K/month by automating non-prod OCI compute shutdowns and Exadata VM cluster scaling with Terraform and Python
- Built a Python pipeline using Tanium's GraphQL API to analyze admin privileges across 33K+ corporate devices, surfacing security risks in Power BI

Stratus Materials

Pittsburgh, PA

Software Engineer Intern

Jan 2026 - May 2026

- Reduced Tableau load time from 5 minutes to under 2 seconds for 10+ researchers by optimizing PostgreSQL indexes, materialized views, and data relationships on a 600M+ row table
- Built a Python and DuckDB pipeline processing 44M+ IoT sensor records, automatically repairing 180K+ PostgreSQL inconsistencies for reliable battery material analysis
- Engineered a Python ETL pipeline with a LangChain RAG agent to resolve ambiguous schema and data-quality issues, reducing manual data preparation 92% before loading into PostgreSQL

University of Pittsburgh

Pittsburgh, PA

Undergraduate Teaching Assistant

August 2025 – December 2025

- Led recitations and office hours for 70+ students, simplifying DSA concepts to improve assignment pass rates
- Provided 1:1 Java debugging support, coaching recursion and Big-O analysis to reduce repeated student errors

FACET Lab @ University of Pittsburgh

Pittsburgh, PA

Undergraduate Research Assistant

May 2025 – September 2025

- Developed a Python student-behavior simulator and trained a reinforcement learning model to adapt tutoring responses across 7 learner states for girls learning robotics, achieving 93% prediction accuracy

i7 Consulting Group

Woodbine, MD

Software Engineer Intern

May 2025 – July 2025

- Built Java Spring Boot REST APIs supporting timesheet submission and approvals for 20+ employees, with MariaDB persistence and Spring Security authentication
- Automated build, testing, and deployment of Spring Boot services with Docker and GitHub Actions CI/CD, cutting deployment time by 78%

PROJECTS

Chi Alpha Leaders App | *Typescript, React Native, Expo, Firebase*

- Developing a React Native/Typescript + Firebase app serving 200+ Chi Alpha leaders and staff, unifying communication, weekly lesson plan distribution for Bible studies, and videos required for leadership training.

SyncWave | *Next.js, Node.js, AWS Lambda, AWS SQS, DynamoDB, Spotify API, Youtube API*

- Built and deployed a full-stack YouTube-to-Spotify playlist converter, matching 91% of 1,037 songs with fuzzy search and caching to reduce redundant API calls

Open Ear | *Python, WebSockets, Deepgram, Twilio, OpenAI*

- Built a real-time AI voice agent with Twilio, Deepgram, and OpenAI that holds natural phone conversations with interruption handling and sub-1s response latency

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, C, C++, HTML/CSS

Frameworks/Libraries: Spring Boot, Spring Security, Spring WebFlux, React, Next.js, Node.js, Flask, LangChain

Cloud & Data: AWS, OCI, PostgreSQL, MariaDB, MongoDB, Redis, DynamoDB, DuckDB

DevOps & Tools: Terraform, Docker, GitHub Actions CI/CD, Git, GitLab, MCP, Linux, Tableau, Power BI
